

ADI Safety Tips

School Zones Back in Action

Hazard

Speed
Breaking Distance

Action

Watch for flashing lights
Reduce Speed to 25km/h

At a supervised crossing, observe the directions of the school crossing supervisor.
Don't Double park your car
Always park and turn legally around the school.
Keep a watchful eye on quick moving kids
Try and give yourself extra time when you can to be better prepared and remaining calm during a busy time of the day.

Considerations

Does your state have 40km or 25km zones?
Watch for flashing lights on buses as children may be crossing. A 40km/h or 25km/h (SA) limit applies when school bus lights flash.

Learnings

Braking distance travelling at 40 km/h is 5-6 meters and that is not taking reaction time into consideration.
