

Avoiding Animal Collisions

Every year in Australia, thousands of collisions occur between motor vehicles and animals

The most common animals that drivers encountered on Australian roads in 2018 were Kangaroos, followed by Wallabies, Wombats, Dogs, Emus, Foxes and Cows

Tips for avoiding animal collisions...

- **Plan** your trip, factoring in the environment you will be driving in
- **Be vigilant** and aware of your surroundings
- **Reduce your speed** when you see an animal on the road or a wildlife warning sign
- **Avoid swerving** if an animal crosses your path
