

COVID-19: Keeping your vehicle safe

If you feel unwell stay at home and don't spread the infection

Before you leave home, if you have any COVID 19 symptom, don't leave, stay home and seek medical Attention

Cleaning Your Vehicle

Alcohol and/or detergent solution with water are suitable to clean your vehicle. You must clean areas that you regularly touch. If you share a vehicle, take special care and ensure all areas are cleaned thoroughly.

Wipe Down:

- Door handles – inside and outside the vehicle
- Gear knobs
- hand brake
- Wiper lever
- Lights and indicator levers
- Keys and start buttons
- Steering Wheel
- Seat and adjusting levers
- Mirror and mirror control
- Seatbelt
- Radio dials
- Temperature controls and
- Fuel nozzle (refueling)

Do this every time you drive a vehicle someone else has driven before you.

We advise against using Hydrogen Peroxide or Bleach. These solutions will kill the COVID 19 virus but will also damage most interior surfaces in a vehicle.

Passengers in your car

- Keep your distance from passengers in your car
- Drive with your windows down or ajar
- Have regular breaks, maximum of 90 mins driving time
- Air conditioner on fresh air
- Ask passengers to wash their hands when you stop for refueling or meal breaks
- Wipe your vehicle's interior down after leaving your vehicle

Guidelines for ADI Instructors

All trainers are given a COVID 19 pack consisting of the following:

- **Hand wash** – Wash hands Before and after any meal breaks. Trainers and clients are required to wash their hands with “soap on tap” with running water or alcohol wipes
- **Hand gel**: When soap & water are unavailable
- **A spray bottle** with methylated spirits and a cloth for cleaning the interior. The steering wheel, door handles, hand brake, gear stick and key of start button must be wipe prior to a new driver taking control of the vehicle
- **Tissues and disposal bag**. Any tissues used must be disposed of immediately
- **Windows** are required to be down when suitable to allow airflow
- **Theory** is conducted in a room allowing 4 square meters per person or outside
- **Trainers** have agreed to self-isolate when not training. this includes no social gathering, private extended family BBQ's and not attending any group gatherings.
- If any trainers or clients start to show any **symptoms of illness**, training will be cancelled, and ADI and Clients office will be contacted
