

Facts

Public health recommendations, such as working from home, have resulted in fewer vehicles on the streets, more people walking and cycling, and some streets closures.

During lockdown and reopening periods, cities around the world have recorded an increase in speeding. Resulting in a higher ratio of fatal crashes to all collisions.

Prevention Strategies

Don't speed; drive to the conditions

Slow down in weather events

Make sure your vehicle is in optimal condition

Scan left & right at intersections

Make yourself visible

Avoid overtaking

Always be prepared to stop

Never drive through flood waters

keeping it safe outside your vehicle

Driving in COVID-Normal Conditions

simple, yet life-saving
recommendations to keep
you safe on the road
